

Brief Explanation of HTML:

HTML (HyperText Markup Language) is the standard markup language used to create and design web pages. It provides the basic structure of a webpage by using elements called tags.

Key Features of HTML:

- *Creates the structure of web pages.
- *Supports text, images, audio, video, tables, and forms.
- *Allows linking between web pages using hyperlinks.
- *Works together with CSS (for styling) and JavaScript (for interactivity).
- *Easy to learn and widely used in web development.
